

# Report for 2023 WordPress Annual Survey

Compiled by Dan Soschin for WordPress.org

## Overview

- The survey has run annually for about a decade-plus
- Seeks to capture sentiment, identify trends, and provide actionable insight about the project at a high level
- In 2023, the survey ran from Sept 22 through Nov 10 (about six weeks)
- Promotion
  - Various web banners throughout the WordPress.org website
  - Social media posts on the official WordPress channels
  - Blog posts by WordPress.com, Hostinger, and Bluehost
  - Emails to clients at Hostinger
  - Posts to Making WordPress Slack
  - Coverage by Search Engine Journal, Post Status, WPTavern, and others
  - WPBriefing podcast coverage

## Updates for 2023

- Updated questions for clarity (wording)
- New questions reflecting the WordPress roadmap and sentiment; retired some questions that were no longer providing value
- Single database for all translated surveys (in prior years, separate standalone surveys were created for EACH language. Those answers were then translated back to English, mapped to their English answer equivalents, and then combined in Excel for analysis. In 2023, this is no longer required! All answers are stored in English in a single database for analysis. Translations are shown at the UI level only.
- Updated language set - added some new languages contributed by the community.
- New platform (Alchemer) provides advanced functionality, multi-lingual support, improved analysis and reporting, improved accessibility, and an improved UI for end users.

## Completions

Completion Rate:	100%	<div></div>	
	Complete	<div></div>	3,922

---

Totals: 3,922

## Completions Over Time

## Completions by Year

Completions were up 17% year over year but fell short of recovering to 2021's level of >7,000, which was the goal for this year.

The line chart above confirms analysis from prior years that length of time does not strongly correlate with an increase in completions. Note the spike at the end corresponding to three days of social media posts announcing the close of the survey window.

### Completions in Prior Years

Year	Submissions
2015	45,995
2016	15,585
2017	16,245
2019	6,203
2020	17,295
2021	7,710
2022	3,357
2023	3,922

## Completion Rate

- The completion rate for 2023 was 79% compared to 63% in 2022, an increase of 25% y/y and 58% compared to 2021.
- In 2022, there were approximately 1,971 partial submissions; in 2023 this decreased to 1,075.
- A new metric captured is views of the survey without answering a question, which totaled approximately 11,153.
- Possible explanations:
  - Increased publicity of the survey, including to groups outside of the previously targeted groups, including Hostinger WordPress clients, for example
  - Some comments regarding the survey among a select group of contributors on Twitter and Slack
  - More impressions of the survey link on the WordPress.org website
  - Directly linking to the survey vs the /news post in certain promotions
- The completion rate was approximately 2x on desktop vs mobile

## Completions by Language

In 2023, Italian was discontinued, and four additional languages were added (Portuguese, Swedish, Persian, and Armenian).

English increased significantly, likely because the survey defaults to English, and then respondents must select an alternate language from a menu.

Language	2023 Completions	2023 %	2022 %	2022 Completions
English	2974	76%	57%	1889
